

Put this jet-age safety check in your car.

You've got a seat belt fitted. Fine. But many drivers forget to use them, or are careless. Aircraft passengers can't forget, of course. The seat belt message is flashed loud and clear. A good idea, says Smiths, so let's have a sign for motorists too! The Smiths SEAT BELT Indicator lights up when you turn on the ignition and is only cancelled out when the re-set button is pressed. It's a simple reminder that could save your life, your passenger's life. Fit a Smiths SEAT BELT Indicator. Smiths Industries have been making indispensable instruments like this for as long as anyone can remember. Tachometers to indicate best r.p.m. in each gear and keep the engine out of trouble; Dual Gauges — combination Oil Pressure and Water Temperature Gauges; Battery Condition Indicators to help you avoid breakdowns; lots more, and each clean-lined, easy to install. Only with SMITHS do you get this quality; 12 months' guarantee and dealers all around Australia.
